OBJECTIVES

PHYSICIAN'S PROGRAM

The overall goal of this symposium will be to highlight state of the art information concerning potentially new chemotherapeutic approaches for particularly refractory cancers.

Topics Include:
- Drug Resistance
- Toxicity
- Drug Delivery Scheduling
- Drug Dose Limits
- New Targets
- New Delivery Mechanisms

NURSING PROGRAM

The overall goals and objectives of this symposium will be to review the nursing management of the cancer patient receiving new and complex therapies.

The program will:
- Explore nursing's role in the care of patients enrolled in clinical trials;
- Identify nursing interventions related to the symptom management of patients receiving new chemotherapies, including biologic response modifiers;
- Explore alternative nursing care delivery models.
